Opportunities

1) Join the TinyML Academic Network: edu@tinyml.org
2) Participate in the AI for Good Challenge:

   https://aiforgood.itu.int

Networking

Please use the “**ictp-workshop**” Discord channel!

Please join Discord by following this link: https://discord.gg/zKWgwhSAEY if you haven’t already done so!

We will post **news, opportunities, workshops** only on Discord.

IEEE Design&Test

Call For Papers
Special Issue on “tinyML – The ecosystem for next generation ML systems.”

Aim and Scope

tinyML encapsulates and nurtures the fast-growing branch of ultra-low power machine learning technologies and approaches dealing with machine intelligence at the very edge of the cloud. These integrated "tiny" machine learning applications require "full-stack" (hardware, system, software, and applications) solutions including machine learning architectures, techniques, tools, benchmarks, and approaches capable of performing on-device analytics. A variety of sensing modalities (vision, audio, motion, environmental, human health monitoring, etc.) are used with extreme energy efficiency, typically in the single milliwatt (and below) power range, to enable machine intelligence right at the boundary of the physical and digital worlds. We see a new world with trillions of distributed intelligent devices enabled by energy efficient machine learning technologies that sense, analyze, and autonomously act together to create a healthier and more sustainable environment for all! The tinyML ecosystem is fueled by (i) emerging commercial applications and new systems concepts on the horizon; (ii) significant progress on algorithms, networks, and models down to 100 kB and below; and (iii) current low-power applications in vision and audio that are already becoming mainstream and commercially available. Over the last few years, the tinyML ecosystem has grown significantly in terms of research, innovation and products. Several stakeholders from academia, industry and policymakers emerged as key leaders in this field. The objective therefore of this special issue, is to bring together the key stakeholders of the tinyML ecosystem, in presenting the state of the art in tinyML research and innovation, through a set of contributed manuscripts that detail advancements in research and innovation, identifying

Show and Tell

- Addressed to young researchers, students, practitioners
- Informal → not academic

TinymML4D Academic Network 2nd Show and Tell on October 27th, 2022.

The First TinyML4D Show and Tell of student projects was October 27th, 2022. The recorded video is at this Youtube link https://youtu.be/s8_hKpOWUwY 2

Presenting is:

1. Samson Otieno Ooko, University of Rwanda, TinyML Based Self Diagnostic Kit for Respiratory Diseases,10 minutes. Video starts at 4:37
2. Mateus Faria Delangélica, Universidade Federal de Itajubá (UNIFEI), The Impact of TinyML on an Assistive Technology Project in Brazil, 15 minutes. Video starts at 13:48
3. Ezzeldin Ayman Ibrahim Ismail, Universiti Teknologi Malaysia, Anomaly Detection in the Temperature of an AC Motor Using Embedded Machine Learning, 10 minutes. Video starts at 31:12

TinymML4D Academic Network 2nd Show and Tell on December 1st 2022.

The full video is at this Youtube address https://youtu.be/e49pkjnlMlQ 1

Presenters in the order of presentation are:

1. Wong Khai Chiuan, Universiti Teknologi Malaysia Malaysia, Smart Switch Based on Embedded Machine Learning, 10 minutes. Video at 0s here 1
2. Laila Daniela Kazimierski, Centro Atómico Bariloche, Argentina, Study of animal movement: using the TinyML kits for monitoring, 15 minutes Video Starting at 11:13 here.
3. Slimane Larabi, Usthb University, Algérie, Human-Computer Interaction: Hand Gesture Recognition for Mute People Using Tiny Machine Learning, 10 minutes Video at 29:39 here
4. Md Sharif Ahmed and Prabha Sundaravadivel, The University of Texas at Tyler, United States, Automated American Sign Language (ASL) using TinyML, 5 minutes. Video at 44:13 here
5. Jackline Tum, Dedan Kimathi University of Technology, Kenya, Using TinyML to Monitor Bees, 10 minutes. Video at 47.58 here

What do you need more?

Hardware?Books?

Open training material?

Seminars on specific topics? Introductory seminars?

In-person workshops in your country?

How should we stay in touch?
